Embed Presentations in Your Website

You can easily embed PowerPoint presentations from SlideShare into your website. This is a great way to have students check out the work you've put into your teacher website. You can have students watch the presentation and answer a few questions as an assignment.

1. Create your free account at www.slideshare.net .
2. Search for an educational presentation of your choosing.
3. Double click the thumbnail to watch the presentation.
4. After you have decided on the presentation for your website (remember that you can also upload your own presentations), copy all of the script in the box next to Embed (highlight and use Ctrl c **or** Edit – Copy in browser window).
