

PowerPoint Instructions

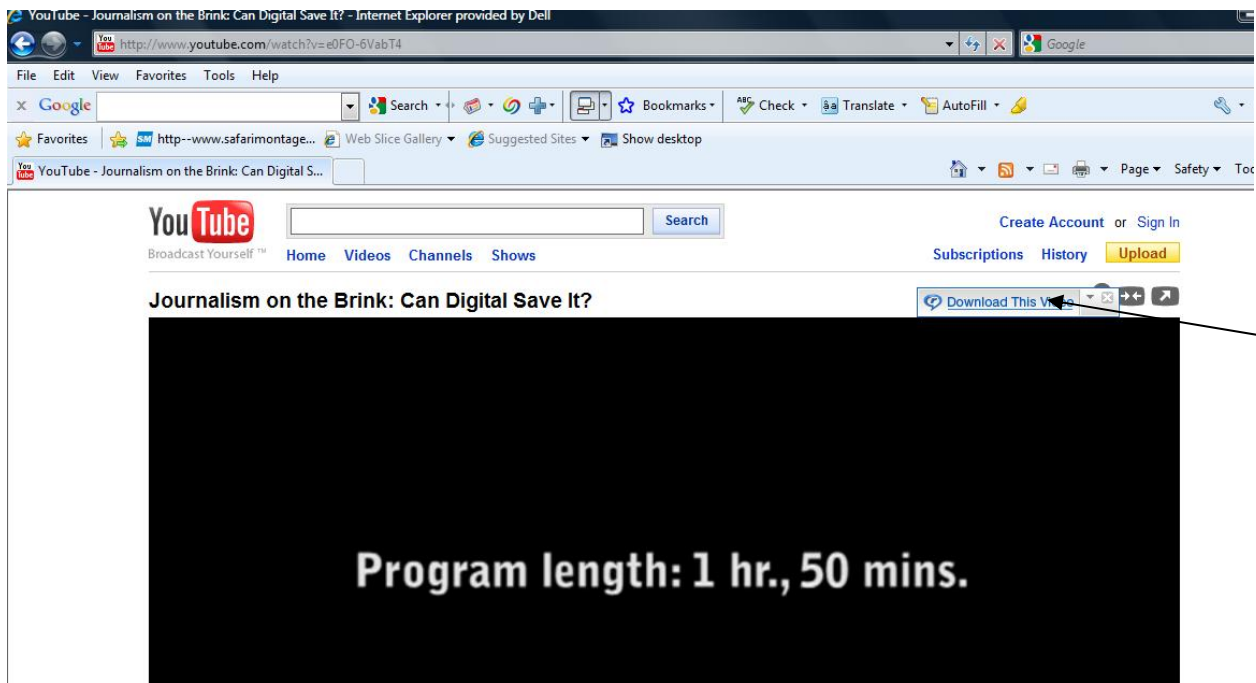

Embedding Videos from YouTube and YouTube EDU

Here are steps for downloading and converting videos from YouTube and YouTube EDU and embedding them into PowerPoint. You can do this from home and bring your presentations to school using a jump/flash drive.

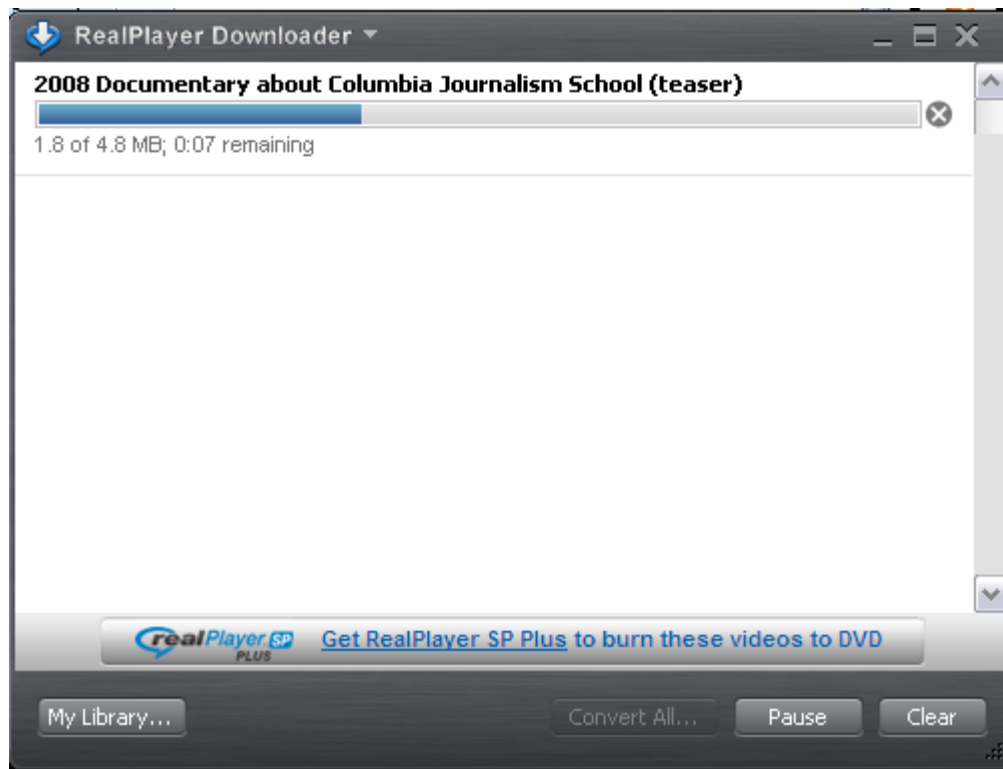

1. Download and install Real Player SP <http://www.real.com/realplayer>
2. When setting up the player, make sure the Download & Recording button is enabled. Follow steps to download.

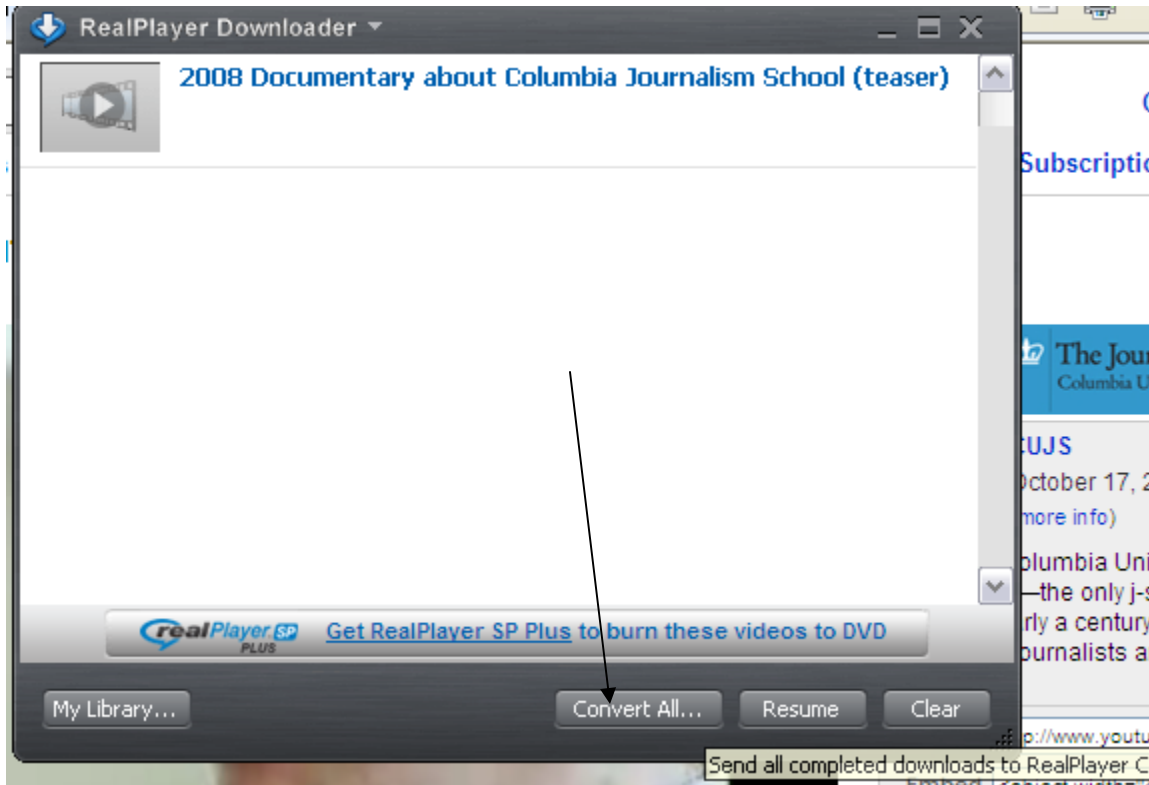

3. Open YouTube or YouTube EDU. Find a video for your content area.
4. When playing the video, notice the Download This Video bar at the top right. See illustration below. You may need to mouse over the area to see the download bar.

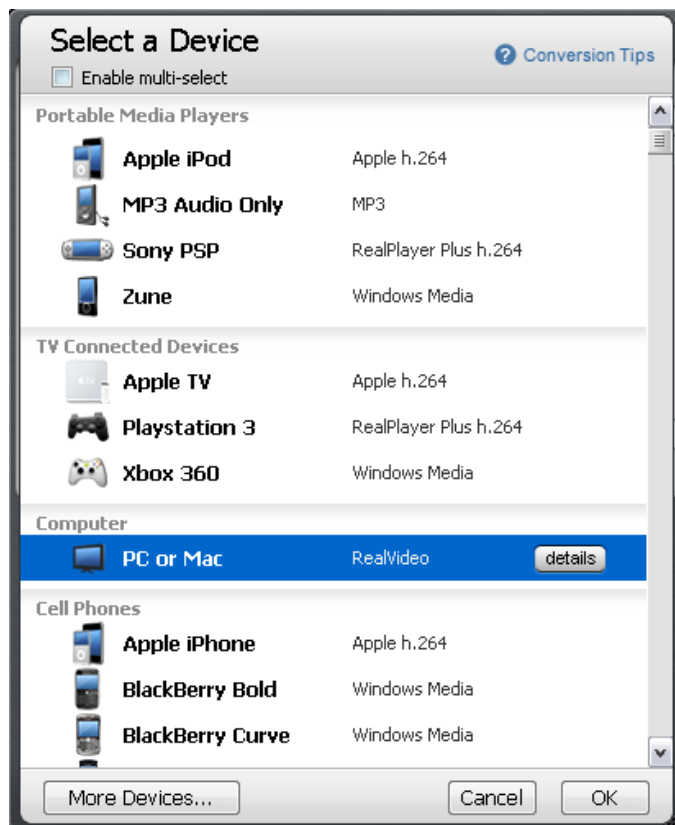

5. Click on Download This Video. Videos will be downloaded into My Documents - My Videos folder. Downloading will begin automatically.

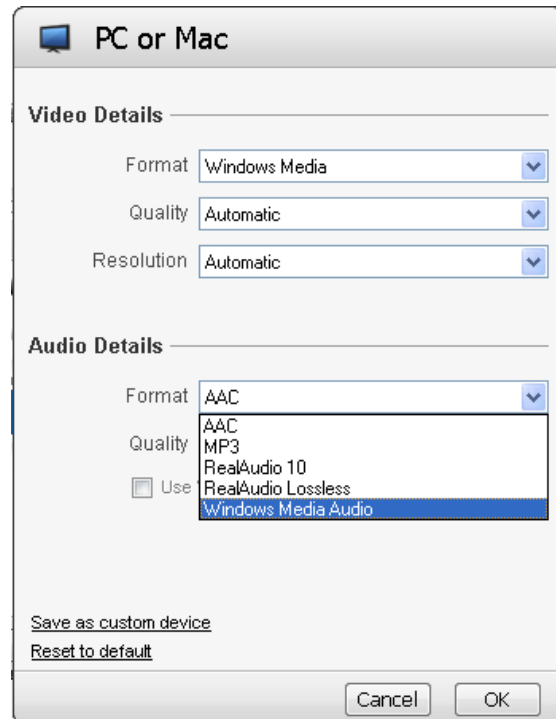

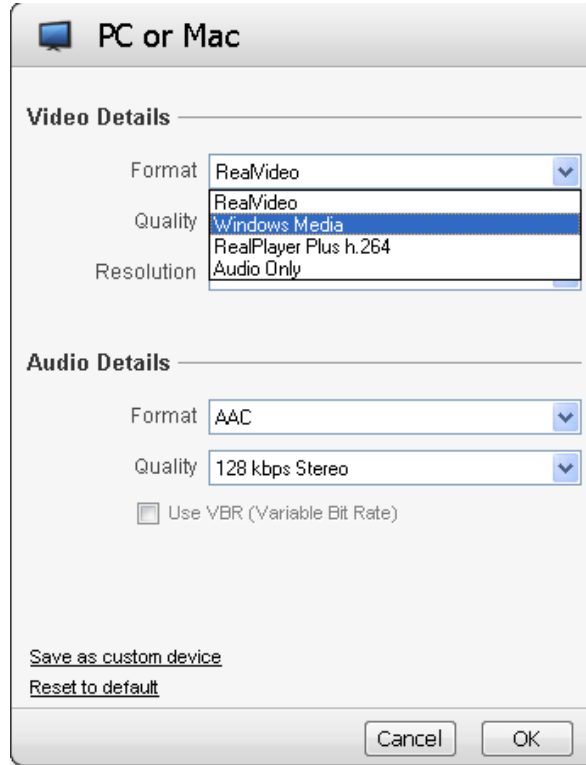

6. Click on Convert All when download is finished. See illustration below.

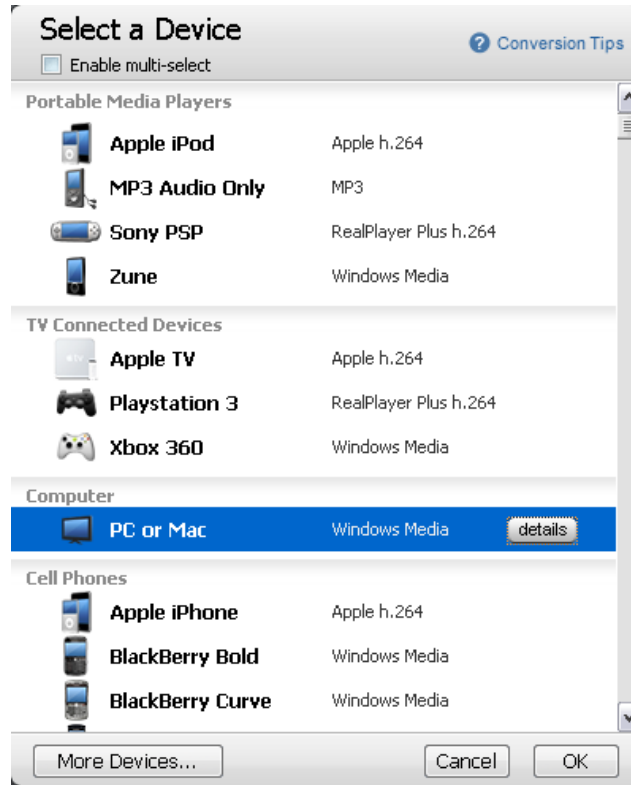

7. Select a Device. Choose PC or Mac and click “details”.

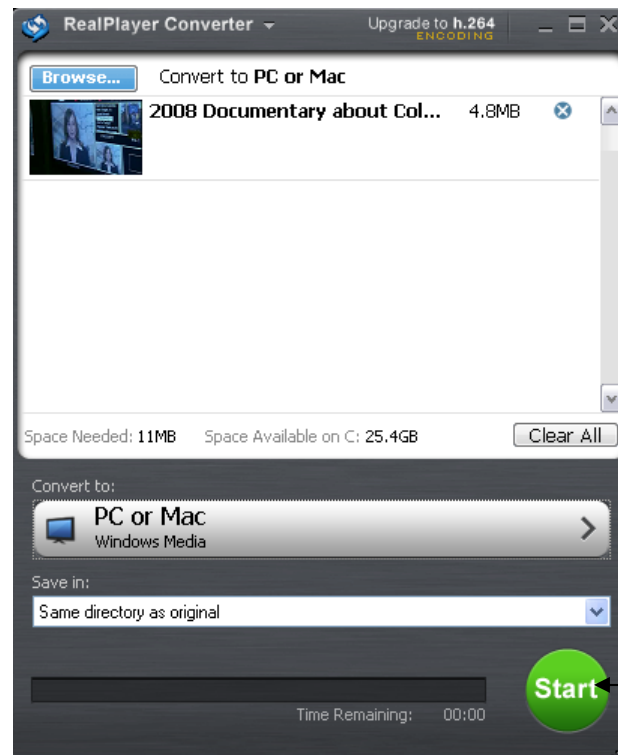

8. Choose Windows Media under Video Details. Choose Windows Media Audio under Audio Details.

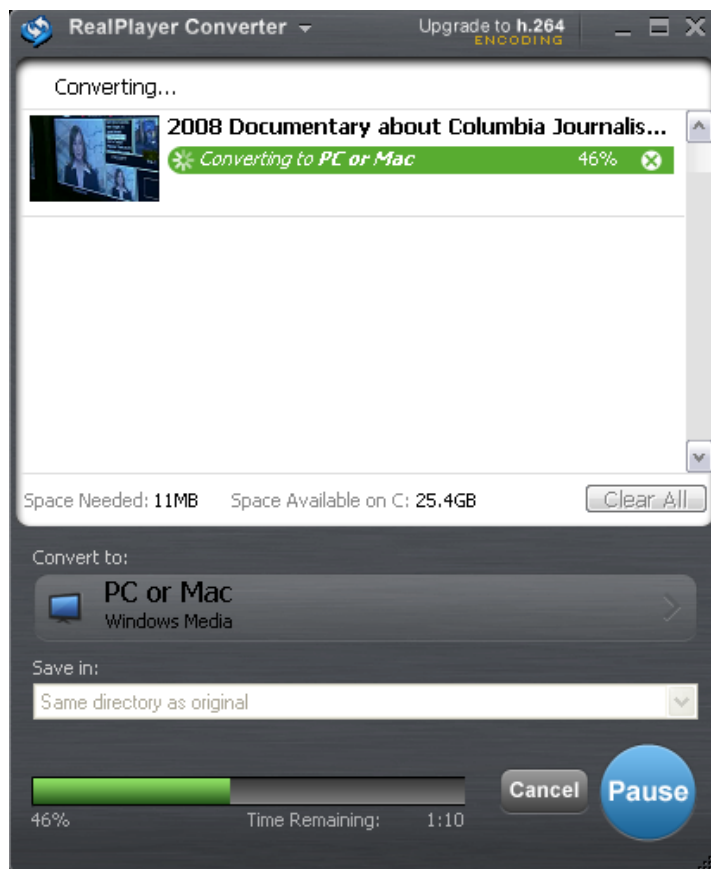

9. You will now see Windows Media listed next to PC or Mac.

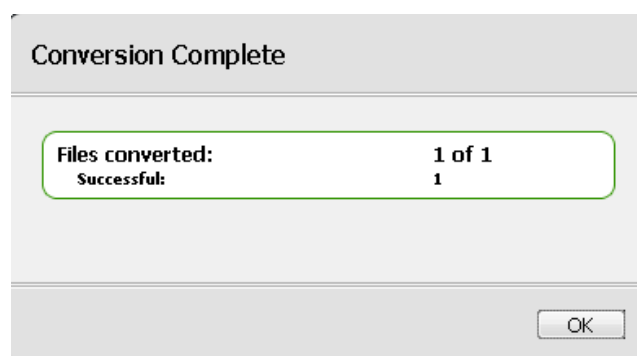

10. Click the Start button to convert.

11. Your video will convert to a .wmv file and will be added to My Videos.

12. You will see a Conversion Complete when finished.

13. Open PowerPoint. Go to Insert – Movie. Browse to My Videos and insert.
